Subject: Transportation and Disposal Issues
Contract #68-WB-0102, S&D Engineering Services

C. E. Fitzsimmons
From: Charles E. Fitzsimmons
Project Officer, RPB

To: Ordering Officers - RPB and RAB

On March 8, Stan Murphy, Bruce Sprague and myself met with Edward McCracken of S&D to discuss T&D coordination problems that the contractor appears to be experiencing. Singled out as examples of such were the Ellis Property and Holly Chem Removals.

The following suggestions were offered:

- That S&D designate a T&D Coordinator
- That OSCs memorialize all directives to Response Managers in a Daily Work Order preferably prior to demobilization.

A designated T&D Coordinator should allow for a more efficient disposal service from the contractor. It is important to clarify your disposal needs, especially with regard to the type of facility (refer to your CERCLA Off-Site Policy) and your desired schedule. It was agreed that the use of a Daily Work Order would provide a vehicle for this to occur.

Should you have recurring problems on this issue or any other please don't hesitate to contact me.
